

TOX AFTERCARE

Procedure: Tox
Pain Level: 3/10

Treatment Time: 15 Min
Downtime: None

Following Botox injections, and for 1-2 hours after, exaggerate your expression in the area treated (i.e. squint, frown, purse lips, etc) to really saturate the muscle fibers. It is also recommended that you do not lie down for 4 hours. Applying make-up and exercising immediately after the procedure is fine. Do not massage the area treated.

Remember! It can take 10-14 days for 100% of the Botox to take effect. If you have concerns or questions regarding your results, please contact us.
